

**YBSA Monthly Report
December 2023**

Storage: Water in the 5 reservoirs is at 29% of capacity which is more than 200,000 acre/feet less than average and even greater than compared to last year's capacity at this time. Lake Cle Elum storage is at 22%. Space in the reservoir can be filled to capacity if there is sufficient snowpack in the mountains.

Snowpack Telemetry Snow Water Equivalent: Snow pack in the upper Yakima Basin is at 83% of average and 76% of average in the Naches Basin.
